3 ⁹¹ Listen, read and match. Poslušaj, preberi in poveži.

1 This season starts on 21st March. The weather is cool. When it's windy, we can fly a kite. The snow melts and the first flowers start growing. Birds come back from the south.

3 In this season it gets colder and the days get shorter. Leaves change colours and fall off the trees. School starts. Some birds migrate to warmer places and other animals collect food or grow thicker coats. We pick apples and grapes. This season starts on 23rd September.

2 This season ends on 22nd September. The weather is hot and sunny. Sometimes there are storms. We have long holidays. We often go to the seaside, where we swim in the sea, or we go camping in the mountains.

4 The weather in this season is often cold and sometimes it's freezing. It can be snowy. We celebrate New Year at the beginning of this season. Some animals sleep for a long time during this season. This is called hibernation. This season ends on 20th March.

Seasons poem

Winter, spring,
summer, fall.
Which do you like best of all?

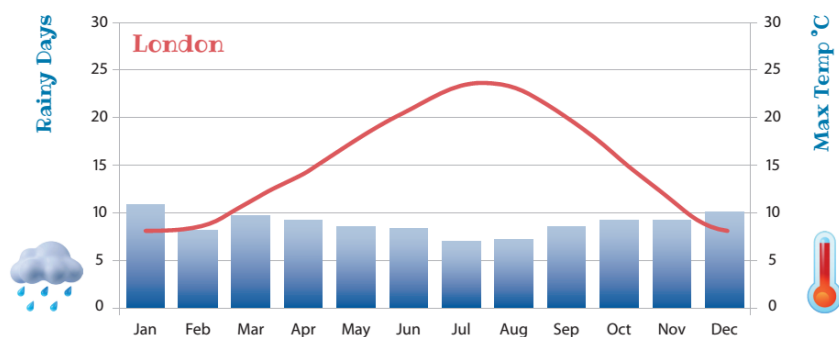

Winter 's cold.
Summer 's hot.
Spring time's green,
and fall is not!

I can't decide,
I like them all,
winter, spring,
summer, fall !

Extreme weather

Page 144

1 ¹⁰⁴ Listen and match. Poslušaj in poveži.

1 **Extreme weather** is weather that is different from the usual weather. Some examples of extreme weather are thunderstorms, heatwaves, heavy rain and strong wind. These types of weather can be dangerous. They can damage buildings and hurt people. People can even lose their lives in extreme weather.

2 **Thunderstorms** bring strong winds, heavy rain, and sometimes hail. Hailstones are small balls of ice that fall from the clouds. They can be as big as eggs and can fall as fast as 170 km/h. Thunderstorms often form in the afternoon and evening when warm air rises into cold air.

4 Heatwaves are long periods of very hot weather. They're dangerous for the old people and for young children. They're also dangerous because they can cause **wildfires** – these are big fires that spread in a forest. The biggest wildfire in Slovenia happened in July 2022. More than 10,000 firefighters tried to stop the fire for 17 days. It can take 80 years for the forest to recover after a wildfire.

5 **Lightning** happens very quickly in a thunderstorm. It is a powerful burst of electricity. The air near a lightning strike is hotter than the surface of the sun. **Thunder** is the loud sound you hear after the lightning. You see the lightning first because light travels faster than sound. The louder the sound you hear, the closer you are to the lightning.

3 **A flood** is a rise in water when a lot of rain falls down in a short period of time. When the water in the river has nowhere to go, it covers the land that is usually dry. 15 centimetres of water can knock you down and 60 centimetres of water can take a car away. Floods usually happen in autumn when the weather is rainy. More people die because of floods than any other extreme weather event.
